Interview Templates

The following interview templates are based on Brenda Dervin’s “sense-making” approaches for conducting research. They are designed with the assumption that a need can be better identified and met using a human vs. system approach. Using the human approach, data is collected about users and potential users using human terms rather than library or system terms. The end result is a translation of typical library inputs and outputs into terms of human experience that more effectively speak to voters and policy makers.

Samples include both close-ended and open-ended questions.
- Close-ended questions provide a fixed list of choices; respondents choose the best possible answer. They are often clearer to understand and easier to compile.
- Open-ended questions allow respondents to be more thoughtful about their answers. They often result in richer responses, but are more difficult to compile.

Dervin breaks assessments into two categories:

**Needs** assessments – collect data to assess the needs of both users and potential users

*Note: When you do needs assessments to help you plan library services and collections, you need to design them based on finding out how people deal with the real-life situations they face. This is not the time to give people a publicity pitch. You must focus on how they describe their needs.*

Types of questions asked for needs assessment:
- What situations do you face that cause you to look for help?
- What helps you resolve your situations?
- What is still unresolved?
- What questions do you have?
- What kind of help do you hope to get?

**Accountability** assessments – collect data to see how well the library meets user needs

Types of questions asked for accountability assessment:
- How much do you know about the library?
- Which of the things the library does do you like best?
- What kinds of materials did you check out the last time you were at the library?
- Is the library located close enough to your home?
- How often do you use the library?
- Do you want the library to offer more of something (e.g. books, DVDs)?
- When did you last use the library?
I. Key Informant Close-ended Needs Interview Template

Note: I have used the phrase “key informant” because it refers to those key community residents who are in a position to know a community as a whole, or about a specific target group. Key informants can be professional people who work with or a member of a specific target group. They can be young or old, and from a variety of socio-economic levels or ethnic groups.

Additional information and tips about needs assessment with a section on key informant interviews is at http://ppa.aces.uiuc.edu/NeedsAsmnt.htm

Interviewer explains the purpose of the interview and then introduces each of the following questions.

1. I’m going to read a list of different situations. They are situations we all encounter in our daily lives – they may happen at home, work, school or elsewhere. Please tell me if you were involved in any of these situations in the past month. (Interviewer underlines YES answers).
